# Storage Bench

## Adjustments For Basket Sizes

Finding baskets to fit the openings in the bench can be a challenge. But if you can find some that are in the ballpark, this handy utility will help you resize the components of the bench to accommodate your selection. All you need to do is type in the actual height and width of the basket in the field labeled "Input Size" in the chart at right. The utility will then calculate the dimensions for the rest of the bench. Note the revised dimensions for the bottom leg mortise and divider dado locations as well. Don't be surprised if many of the components don't change — usually only a few alterations are needed.

			Basket	Input Size	
	(10" min - 14" max)		Width		
	(8" min - 12" max)		Height		
		Qty.	T	W	L
A	Front Legs	2			
B	Front Rails	2			
C	Loose Tenons	20			
D	Front/Back Cleats	2			
E	Rear Legs	2			
F	Rear Top Rail	1			
G	Rear Center Rail	1			
H	Rear Bottom Rail	1			
I	Back Slats	11			
J	Spacers	24			
K	Back Panel	1			
L	Side Rails	4			
M	Side Panels	2			
N	Bottom	1			
O	Dividers	2			
P	Divider Edging	2			
Q	Upper Side Cleats	2			
R	Bench Top	1			
Bottom of leg to bottom of mortise					
Distance from end of panel to dado
